

JEX-Wallet Agent Business

Multi Bank Balance Package SYSTM

Multi Bank Balance Package SYSTM

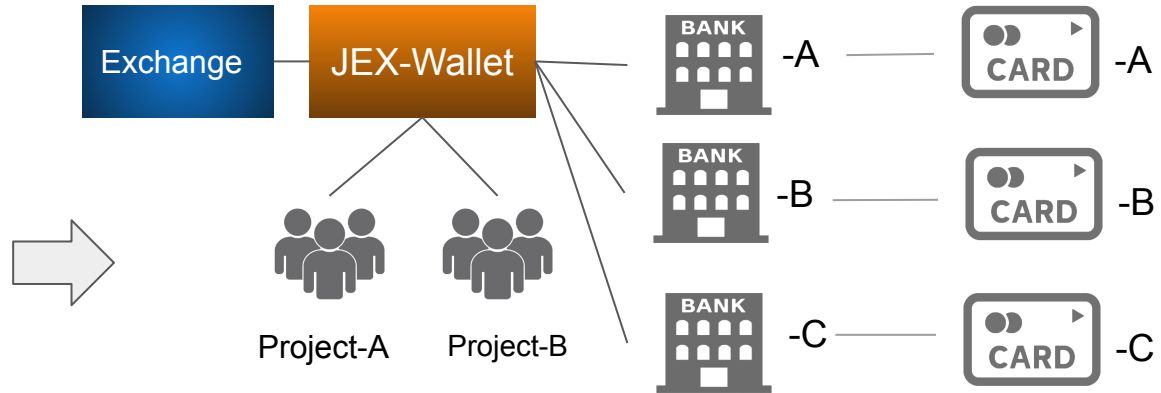

Traditional Wallet Card Structure

There is a limit to the number of child accounts created and issued by Wallet management corporations.

Deposits will not be protected if the Wallet management corporation disappears.

Multi Bank Balance Package Structure

With Wallet as the center, banks, exchanges, securities companies, and projects from various countries are linked together, enabling borderless development across countries from the start.

Furthermore, since the wallet card is linked to each individual's bank account, it is not impossible to use the wallet card due to the increase in the number of members as before. Also, even if the JEX-Wallet disappears, each bank account and card can continue to be used.

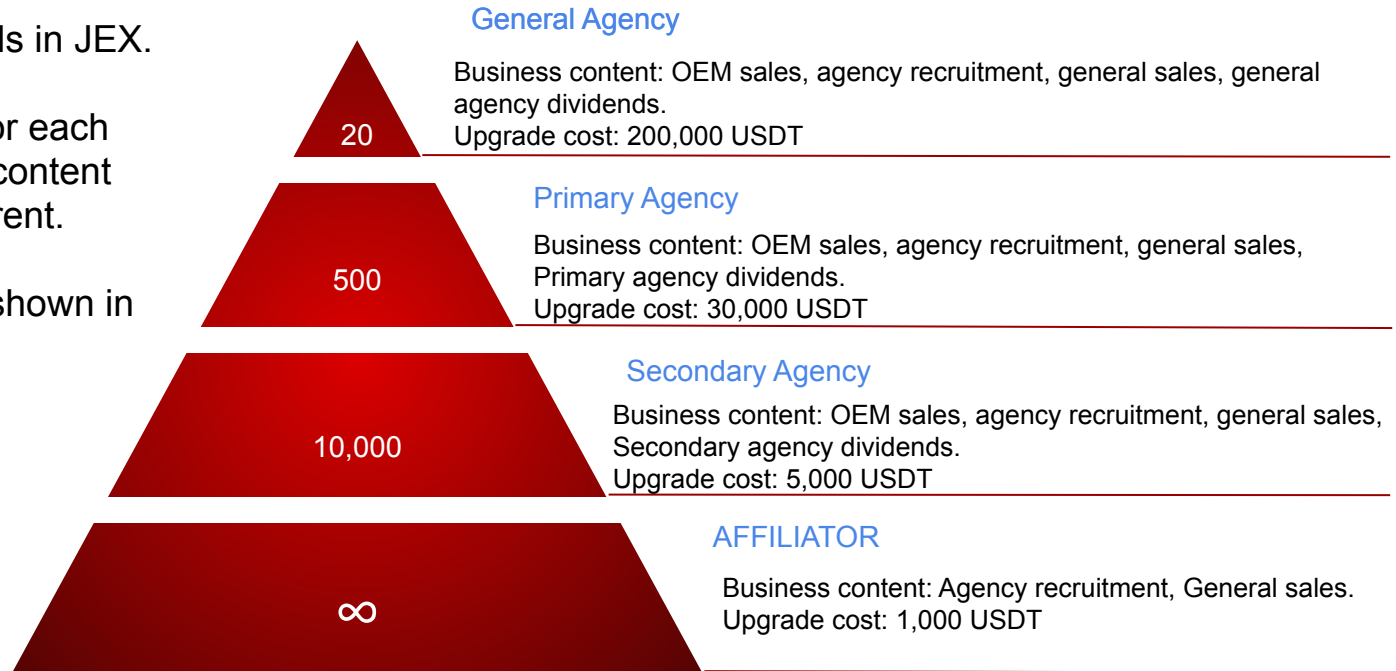

Agent Level

There are four agent levels in JEX.

Agents have a capacity for each level, and their business content and profit model are different.

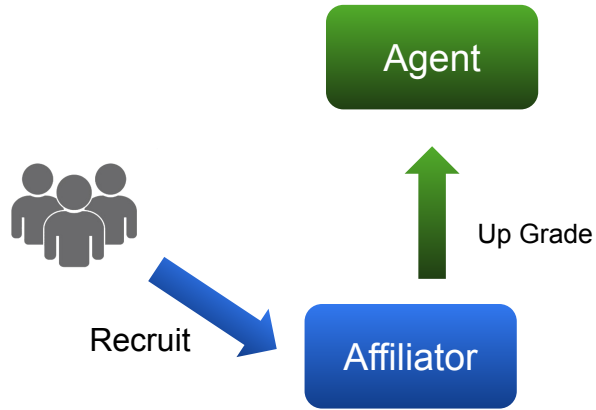

Details of each level are shown in the figure on the right.

Agent Business Contents

Agent Recruit Marketing

Agents can initially register at the affiliate level. You can then upgrade to the desired level. Referred agents will receive up to 5 sales and direct referrals upgrade fees.

Lv.1 8%
